

Abstract

Described is a stamping film (10) for the simple production of tamper-proof motor vehicle license plates and a motor vehicle license plate using such a stamping film (10) for the production thereof. The stamping film (10) comprises a carrier film (12) and a transfer layer (14) which is detachable from the carrier film (12) and which can be fixed on a substrate (32) of the motor vehicle license plate and which – starting from the carrier film (12) – has a transparent release layer (16), an opaque decoration layer (18), a transparent protection layer (20), an optically variable layer (22), a reflection layer (24), a colored layer (28) and an adhesive layer (30). The decoration layer (18) has mutually spaced areal interruptions (36) at which the transparent protection layer (20) adjoins the release layer (16). The adhesive layer (30) is provided for fixing the transfer layer (14) to the substrate (32) of the motor vehicle license plate.
